Our Model

The Safe Futures model is premised on a "wrap around" process of service delivery. Safe Futures provides intensive, holistic and individualised care planning and case management. Client case plans aim to develop problem solving and coping skills and self-efficacy of Family Violence Survivors. Safe Futures wraparound Philosophy of care begins with the principle of "voice and choice" where self-determination and the perspective and views of the family, including that of the child or young person must be given primary importance during all phases of service delivery. The wrap around approach places the individual and family at the centre and builds a support team around them to drive change. A strength-based approach is taken to identify and build capabilities, capacity and resources to empower victim survivors of Family Violence. Services are individualised, flexible, community based and culturally competent.
